## Hangar Thermal Destratification System

### Eielson Air Force Base, Alaska

KOMAN Diversified Services, LLC furnished and installed electronically sensed and controlled thermal destratification systems (ceiling fans) for aircraft hangars B1171 and B1176 to move warmer heated air to floor areas.

A multiple-unit approach was selected to balance temperatures from floor to ceiling, resulting in no more than a 0 to 3 degree differential and reducing the run time of heating or cooling systems.
